

Factsheet

Schneider Unity Pro XL

Schneider Unity Pro XL

versiondog - For more Efficient Production

versiondog is the leading version control and data management software solution for automated production. It makes tracking changes and safeguarding data significantly more efficient.

versiondog brings order and clarity where project data needs to be continually changed and made available from a central source. The increased safety, security, and certainty provided by this software system quickly results in measurably increased productivity. versiondog makes it easy for you to optimize the interplay between all your different types of robots, controllers, field devices, drives, programming languages, file formats, and software applications.

This data management system gives you ultimate data traceability, minimizing your risks and costs, and saving you time and effort.

Features and Functions

AUVESY is a member of the Collaborative Automation Partner Program (CAPP) by Schneider Electric	✓
Integrated Schneider Unity project tree	✓
Detect the differences between the backup and the version. Detect the differences between a backup and the previous backup.	✓
Clear presentation of the complete change history	✓
Detailed graphical comparison	✓ versiondog 4.0 and later
Automatic backup for disaster recovery	✓
Supported PLCs: <ul style="list-style-type: none"> - M340 - M580 - Premium - Momentum - Quantum 	✓
Automated archiving of PLC files (*.dtx)	✓
Use selected project to launch Unity development environment from versiondog	✓
Custom component type for Schneider Unity Pro XL	✓
Tutorial available in versiondog INFO	✓

Schneider Unity Pro XL

System Requirements
