Automated Data Migration and Device Integration

Automated Data Migration and Device Integration

versiondog – For more Efficient Production

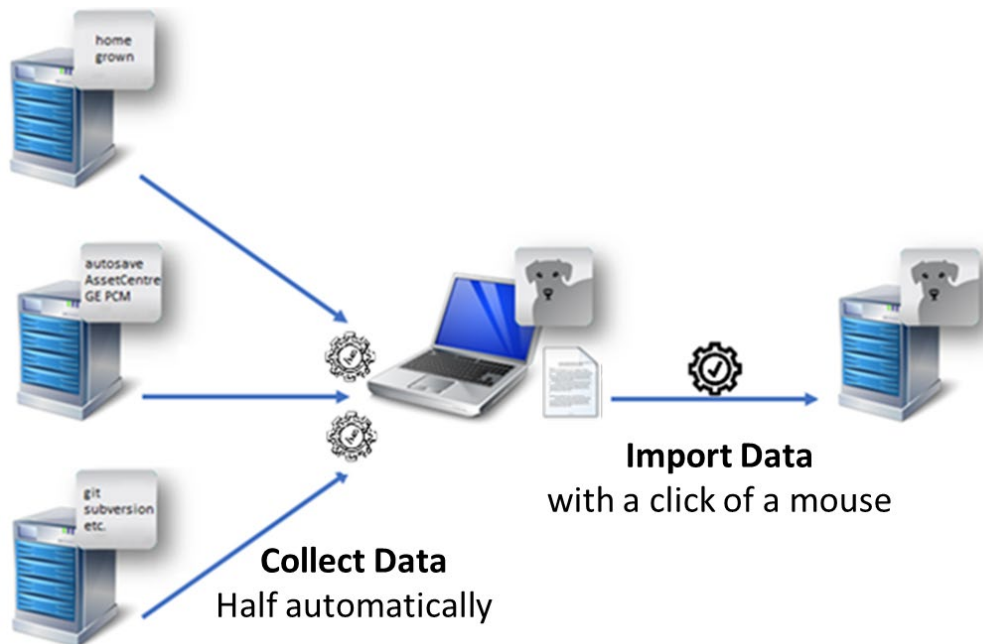

versiondog is the leading version control and data management software solution for automated production. It makes tracking changes and safeguarding data significantly more efficient.

versiondog brings order and clarity where project data needs to be continually changed and made available from a central source. The increased safety, security, and certainty provided by this software system quickly results in measurably increased productivity. versiondog makes it easy for you to optimize the interplay between all your different types of robots, controllers, field devices, drives, programming languages, file formats, and software applications.

This data management system gives you ultimate data traceability, minimizing your risks and costs, and saving you time and effort.

Data Migration

Easily migrate every existing project and audit trail into versiondog. By provisioning versiondog with existing historical data from other systems, you will be able to follow WHO changed WHAT, WHEN, WHERE, and WHY.

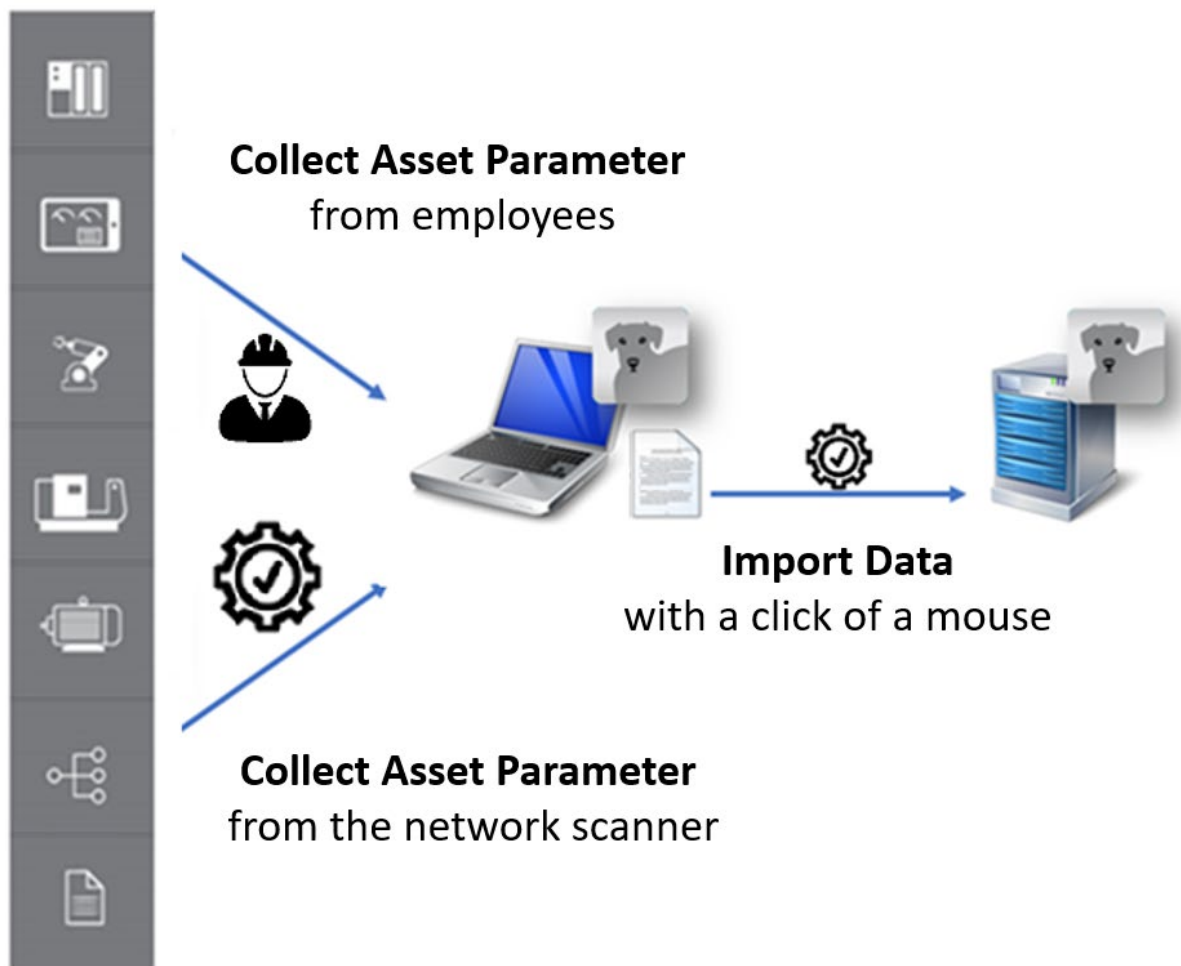

Benefits

Migrate project and audit trail data from other systems into versiondog (WHO changed WHAT, WHEN, WHERE, and WHY)	✓
Supports transfers from most industry standard systems	✓
High degree of automatic export (the degree depends on the system)	✓
Automatic import into versiondog with the click of a mouse	✓
Migration of data can be verified	✓
Data history from other systems can be utilized within versiondog	✓
Quickly provision versiondog with existing historical data	✓

Device Integration

Quickly provision the versiondog server with devices by automatically or manually finding assets, and integrating [any supported device](#).

Benefits

Find assets manually and/or automatically	✓
Every supported device type can be integrated	✓
Ensure that all devices are integrated in versiondog	✓
Automatically import devices into versiondog with the click of a mouse	✓
Reduce manual entry errors	✓
Quickly provision versiondog server with devices	✓
