

versiondog Quicksave

Create Temporary Backups of Ongoing Work

Create quick backups of your work without the need to create a new version

- PREVENT DATA LOSS
- IMPROVE WORKFLOW

What does it do?

- Saves ongoing work on the versiondog server so that you can continue another day or at another workstation
- Keeps change histories clean by only versioning finished work
- Saves file space on the server by automatically deleting outdated interim backups

How will it save time and money?

- Prevents loss of unfinished work
- Increases productivity by simplifying your workflow
- Saves time and effort by reducing manual actions

Are there any requirements or costs?

- Active versiondog server license
