

Asset Inventory Service

Find, Manage, and Analyze your IT & OT Inventory

Automatically obtain an up-to-date overview of your IT and OT assets

- **ASSET MANAGEMENT**
- **ASSET DETECTION**
- **RISK & VULNERABILITY SCORE**

What does it do?

- Manages all your IT and OT assets
- Automatically detects IT and OT assets
- Enriches asset data with information from versiondog
- Generates an asset risk score
- Provides detailed information about your assets (e.g. Firmware versions)
- Generates a risk & vulnerability report
- Discovers devices not yet integrated into versiondog

What are the benefits?

- Increased IT and OT inventory visibility for better patch level management
- Reduced manual work when adding devices
- Optimized IT and OT inventory processes by centralizing information access
- Improved decision making due to aggregated data
- Enhanced efficiency through versiondog compatibility
- Increased visibility for more effective governance
- Reduced downtime due to enhanced vulnerability detection
- Quality and speed of decision making significantly improved due to centralized information access

What are the requirements?

- Active Asset Inventory Service license
- Active versiondog Server license
